

READING SKILLS PROGRAM

Engaging Virtual Instruction

Students attend a weekly class online, where they participate in lively book discussions and learn valuable reading skills. Students also have dedicated reading time and interactive lessons that build confidence and core reading skills.

One-on-One, ELA Support

Students have access to one-on-one, on-demand support from our highly trained instructors. Students also receive support on any ELA-related coursework outside of our program.

Research-Based Curriculum

For over 50 years, we have partnered with hundreds of universities to provide comprehensive reading skills instructions based on literacy research and cover developmentally appropriate reading skills.

Flexible Program Options

Six-week sessions are offered throughout the calendar year, and districts designate when sessions commence. Instructional time can be held before, during, or after school, as well as weekends.

Comprehensive Support

We provide the behind-the-scenes support your district needs, including customized outreach to boost enrollment, program implementation, dedicated technical support, and post-session reporting.
